## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/22/02 has been entered.

### *Response to Arguments*

2. Applicant's arguments and amendments, filed 10/22/02, have been fully considered and reviewed by the examiner. Claims 1-3, 8, and 10-25 are pending.

The applicant has argued the references do not teach the claimed diffusion, strengthening, joining, and compacting of the slip layer during the aluminizing. The examiner is not persuaded by the applicant's arguments. Olson et al. teaches that the aluminizing step includes diffusion into the MCrAlY layer, which strengthens the layer (Col. 4, lines 9-45). Furthermore, the diffusion in Olson et al. would have compacted the MCrAlY layer, as the layer would be less porous. Therefore, the teachings of Olson et al. read on the claimed diffusion, strengthening, joining, and compacting of the slip layer during the aluminizing.

The applicant further argues that the references does not teach the heat treatment of Claim 21 causing a union of the layer with the component. The examiner respectfully disagrees.

Art Unit: 1762

The Rigney reference teaches that the heat treatment diffuses the MCrAlY slurry layer into the superalloy substrate (Col. 5, lines 5-33). This reads on the claimed union.

The remainder of the applicant's arguments have already been addressed by the examiner in previous office actions. The examiner is maintaining his position on these matters.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 8, and 10-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Olson et al. in view of Rigney and GB 2269393 by Floge et al. ("Floge").

Olson et al., Rigney, and Floge are applied here for the same reasons as given above and in paragraph 3 of the previous office action, No. 17, mailed 5/22/02.
